

GUILDFORD GROVE

Project Information

Guildford Grove Primary School is in the process of developing part of their playground as a quiet area. The children and teachers have worked closely with architects to develop the area with seating, planting beds, a pergola and much more.

Art Mosaic Design worked with the school to develop a mural for the back wall to bring colour and texture to the area.

Participants were involved from conception of the design right through to the installation. The design came from drawings produced by the children after a visit to Wisley Gardens and the theme of British flora and fauna came from their drawings.

Time: 10 days of workshops + 5 days installation
Age 4-11

Full project portfolio available for viewing.

Comments

“

from Head Teacher Elizabeth Corlett and Artistic Co-ordinator Dineo Moore:

- Children of all abilities and disabilities were able to achieve and saw their own designs transformed into the mosaic.
- One parent attended every day. Her exposure to positive interactions between teachers and children enabled her to change her approach to her own relationships with her children.
- Very good communication from the artists through the project and a high quality teaching and learning experience for children and parents.
- The mosaic is a real work of art.
